

## Corfix for Electrical Contractors

# Field-First Safety & Compliance— Built for the Way You Actually Work

From switchgear installs to panel terminations and system commissioning, electrical contractors move fast—often across multiple sites, crews, and scopes. But tracking hours, certs, and compliance in spreadsheets or standalone apps burns time and risks accuracy.

Corfix brings it all together: digital safety, certification tracking, and timekeeping built into one mobile system that crews actually use.

### Where Electrical Contractors Struggle—and How Corfix Fixes It

*LOTO compliance is critical—but documentation breaks down in the field.*

Corfix digitizes your lockout/tagout process with custom forms and verified sign-offs—timestamped and ready for inspection.

*Safety forms don't always make it back.*

From JHAs and toolbox talks to energized testing logs, Corfix captures everything from the field—instantly synced to the office, searchable by site, worker, or date.

*Certs like HazCom/WHMIS, Arc Flash, and First Aid expire or become obsolete quietly.*

Corfix tracks them automatically, flags approaching expirations, and gives foremen real-time visibility into who's cleared to work.

*Time tracking is disjointed—or just missing.*

Electricians don't work a clean 9-to-5. Crews shift between rough-ins, panel terminations, inspections, and overlapping project phases—sometimes across multiple job sites in a single week. Corfix captures hours with mobile timecards or punch clock, supports geofencing, shift rules, and supervisor approvals, and keeps labor data accurate without slowing the crew down.

*Codebooks and manuals stay in the truck.*

With Corfix, your NEC/CEC references, SDS sheets, and SOPs live in one digital binder—accessible by QR code, always version-controlled.

*Shared tablets and phones complicate logins.*

Use Kiosk Mode to let any crew member sign in, complete safety forms, or log hours—no password or personal device required.

## What You Get with Corfix

- **Integrated timekeeping** built for dynamic electrical schedules
- **Digital LOTO workflows** that meet compliance standards
- **Instant access to certs, codebooks, and manuals** on-site
- **Automated cert tracking** with expiry alerts and searchable history
- **Inspector-ready audit trails**—for safety and labor
- **Mobile-first design** with offline access and shared device support

**"And as soon as I tell the workers that we have the [code] inside Corfix, that blows their minds because the electrical code is \$400 to purchase. So, we digitize it, and put it inside Corfix – now they have it at their fingertips."**

— Joe Pellerino, H&S Manager, Smith and Long

### Other Electricians Who Use Corfix Say:

"Corfix definitely helps us organize the job. With the forms, with verifying the guys checking in, and with certifications."

— Kyle Peveril, Owner, Pevco Electric

"With Corfix, it was intuitive, and it was easy, and the guys liked it, so they adopted it quickly."

— Robert Riopelle, President, Smith and Long
